SUMMARY

Computer Science and Engineering graduate with hands-on experience building full-stack web applications using React.js, Next.js, TypeScript, Node.js, Express.js and MongoDB. Experienced in developing RESTful APIs, authentication and role-based access control, database-driven applications and responsive user interfaces. Strong problem-solving and collaboration skills with a focus on building scalable and user-focused software solutions.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, Mongoose

Languages: C, C++, Java, Python

DevOps & Tools: Docker, Git, GitHub, VS Code, Postman, Figma, Jira, Trello

EDUCATION

Bachelor of Science in Computer Science and Engineering

Jan 2020 – Jun 2026

United International University, Dhaka, Bangladesh

CGPA: 2.49

PROJECTS

HaatBari – Modern Full-Stack E-Commerce Platform

github.com/shoaibrrian/haatbari

- Developed a responsive full-stack e-commerce platform using Next.js, React, TypeScript, and Tailwind CSS with product search, filtering, cart, wishlist, checkout, and order management.
- Implemented secure authentication and role-based access control using Clerk, with protected customer and admin dashboards for account, product, and order management.
- Built REST-style APIs with Next.js Route Handlers and MongoDB/Mongoose, integrating AI-powered product search, Cloudinary image management, and guest-to-user wishlist synchronization.

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, MongoDB, Mongoose, Clerk, Cloudinary, Zod

UIU Health Care – Student Healthcare Support Web Application

github.com/shoaibrrian/uiu-health-care

- Developed a full-stack student healthcare support web application with role-based authentication and separate Student and Admin dashboards.
- Implemented an Emergency SOS system with real-time admin notifications, SOS status tracking, emergency history, First Aid Guidelines, Mental Health Support, and Health Awareness resources.
- Built RESTful APIs using Node.js and Express.js with MongoDB, and integrated Google Maps API for nearby hospital discovery.

Tech Stack: React.js, TypeScript, Tailwind CSS, Vite, Node.js, Express.js, MongoDB, React Router, Zustand, Google Maps API

THESIS / RESEARCH

Agricultural Soil Nutrient Analysis, Classification and Crop Suitability Prediction Using Machine Learning

Undergraduate Thesis

- Developed a machine learning-based system for soil nutrient analysis, soil classification, and crop suitability prediction using Python and Scikit-learn.
- Performed data preprocessing, EDA, feature engineering, visualization, and evaluated multiple classification models including Random Forest, SVM, KNN, Logistic Regression, Naive Bayes, Gradient Boosting, and Extra Trees.
- Achieved 96.42% classification accuracy using an optimized Random Forest model with 10-fold cross-validation.

Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Jupyter Notebook

GitHub: github.com/shoaibrrian/agricultural-soil-nutrient-analysis

VOLUNTEER EXPERIENCE

Bangladesh Scouts

2011 – 2017

Senior Scout

- Participated in national and regional scout camps, developing teamwork, leadership, and communication skills.
- Led group activities and collaborated with team members to achieve shared objectives.
- Completed training in discipline, emergency response, and basic first aid.
